

PREEN PLUS

General

Specially formulated for professionals, Woodace® Preen Plus is a premium weed control product for the prevention of broadleaf and grassy weeds in shrub beds, ornamental plantings, and other non-turf sites. Preen Plus can be used around over 400 ornamental plants and controls over 150 broadleaf and grassy weeds. Preen Plus offers superior weed control because it combines the power of two preemergent herbicides. Isoxaben (Gallery®) provides excellent control of broadleaf weeds and Trifluralin (Treflan®) controls grassy weeds. Together they combine to provide the most broad-spectrum reliable weed prevention available.

Use

Woodace® Preen Plus should be applied prior to weed germination. For best results apply prior to mulch or lightly incorporate into the surface of existing mulch. Activate with 0.5" of water from rainfall or irrigation. Preen Plus should be spread evenly over the surface. Broadcast applications should be made to get uniform coverage. In densely planted beds application over the top is permissible but avoid the accumulation of product in the leaf axis or in whorled leaves of emerging bulbs and other ornamental plants. Where possible direct the pattern below the canopy of dense vegetation to avoid reflection and accumulation at the drip line. Do not allow product to be piled up or accumulate against trunks or stems.

Key Features

- **DUAL ACTIVE INGREDIENTS**
- **LABELED FOR OVER 400 ORNAMENTALS**
- **CONTROLS OVER 150 WEEDS**
- **EFFECTIVE ON BOTH BROADLEAF AND GRASSY WEEDS**
- **DUST FREE EASY TO SPREAD CARRIER**

Active ingredients

trifluralin: (1,1,1-trifluoro-2,6-dinitro-N, N-dipropyl-p-toluidine)..... 1.5%
 isoxaben: (N-[3-(1-ethyl-1-methylpropyl)-5-isoxazolyl]-2,6-dimethoxybenzamid)..... 0.375%

Bid Specification Sheet

Description: Granular preemergent weed control product on low dust Biodac® carrier. Product shall contain no fertilizer.

Analysis: 0-0-0

Features: A high-density granular preemergent herbicide for the control of both grassy and broadleaf weeds in ornamental beds and other non-turf sites. The preemergent chemistry shall contain components for the control of broadleaf (dicot) weeds including but not limited to dandelion and plantain. The preemergent shall also contain a component that is effective in the control of grassy (monocot) weeds including but not limited to crabgrass, foxtail, and goosegrass.

Size: All particles size shall be 150 SGN

Active

Ingredients: Trifluralin (treflan)..... 1.5%
Gallery (isoxaben)..... 0.375%

Packaging: Product shall be packaged 20 Lbs. per bag. Bags are to be constructed of a metalized polyester polymer that resists moisture and tearing. Product shall be packaged with 30 bags per pallet; each pallet will have a pallet cover and be securely shrink wrapped to prevent damage or shifting in transit.

Odor: When applied to the ground and after irrigation or rain, this product shall be of low odor
